授業科目名	Practice in Health Counseling Science	科目番号	02EU384
単位数	1	担当教員	Sayuri Hashimoto
授業時間	Annual	研究室	D510
科目の種類	practical trainings	メールアドレス	3964
標準履修年次	From 1st grade to 3rd grade	オフィスアワー	Friday 13:00~15:00

授業の到達目標 To acquire intervention skills necessary to a study, based on respective research subject. As prior learning, to submit own assignment setting and goal setting on mastered technique and 2 days training. Also, as a follow-on learning, submit a participation report of practical training. Develop systems that can be applied to acquire skills and solve problems in their field.

授業の概要 This course combines with lectures (25%) and practical trainings (75%). Practice of Health Counseling explores the theories behind "health counseling", "health behavioral science" and "stress science," as well as the basic principles and techniques of counseling, in the context of a multi-tiered learning-oriented examination of behavioral objectives, behavioral change, self growth and system change. Students identify real-life issues from their workplace experience and clarify the salient issues, then apply their knowledge to health counseling systems in the regional, workplace and home environments and engage in fieldwork designed to achieve resolution of same.
